

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Ma Xiao, Organ Procurement Coordinator at the People's Liberation Army No. 302 Hospital in Beijing

Date: July 31, 2016 (Phone number: +86+13911099030)

#### Summary

1. "We have done a lot [of liver transplants]. It's been almost 60 cases in the first half of this year."
2. "Since we work with different hospitals. So the donors would emerge from time to time."
3. "Director Liu Zhengwen [, who does operations,] used to perform surgery for Fu Biao."
4. "The organ transplantation is our highlight."

#### Phone Investigation Recording

Investigator: Hello, hello. Is this Doctor Ma Xiao from No. 302 Hospital?

Ma Xiao: Ah, yes, hello, who is calling, please?

Investigator: Well, I would like to ask you a question. It's about you, you are an organ transplant coordinator, right?

Ma Xiao: Yes, yes, yes...

Investigator: It means that you coordinate the donor organ [procurement], right?

Ma Xiao: Right, that's my job. I contact various hospitals or the hospitals nearby, that is, to find some donors. I am looking for donors, right.

Investigator: Ah, great. There is a high-ranking government official, who wants to do liver transplantation. He has advanced liver cirrhosis. If I come to your hospital, how long do we need to wait? Can we do it very soon?

Ma Xiao: Well, it's hard to tell you now, you need to come here to get registered and take some relevant medical examinations. It's difficult to give an estimate. Some can be done very quickly, but some still need to go through...

Investigator: Have you done a lot this year? If there are a lot, can...

Ma Xiao: Uh, we have done a lot. It's been almost 60 cases in the first half of this year, nearly 60 cases.

Investigator: Oh, that's good. If we wait in line at your hospital, can we get the organ after waiting for one or two months?

Ma Xiao: I am not sure about that, I think it should be, should be ok. We can only say so, because we can't be sure, maybe a couple of days later, we'll find this kind of donors. Because the donors [can be found] at any time, how to put it. [The organ procurement] is not regular. Because we work with different hospitals. So the donors, who are suitable in terms of blood type and so on, would emerge from time to time. But I think our hospital is okay, because we cooperate with many other hospitals, so our donor procurement is better. Yes, anyway, it's your decision. Our No. 302 Hospital is better. Ah, we can't talk about other hospitals. For instance, No. 301 [Hospital] seldom does liver [transplantation]; No. 309 [Hospital] performs a lot of kidney transplants.

Investigator: Oh, yes, yes, Shi Binyi, Shi Binyi has done a lot of kidney [transplants]. I have noticed that different hospitals have different situations regarding their supply of donor organs. Some have more, and others have less. People suggested me to ask different hospitals. So if your hospital has more, then I will ask him to come here.

Ma Xiao: How about this? You register for our hospital's outpatient consultation. Tomorrow our Director Liu will be on duty. You can come to see him or me, or you can get registered for Liu Zhengwen's consultation. He is very famous in the organ transplantation circle. Liu Zhengwen used to perform surgery for Fu Biao, very famous. He is the one, who did surgery for Fu Biao. Because every hospital has their own experts, but experts can work in different hospitals. They can be hired specifically [for their expertise]. He used to work in an armed police hospital, and he has come to work in our hospital as an expert for many years.

Investigator: I see, I thought that Fu Biao had his surgery in an armed police hospital. How come [Liu] has come to your hospital? It seems that the experts can be transferred among different hospitals.

Ma Xiao: Yes, yes, yes. He has excellent skills. Especially in No. 302, in the armed police hospital, he did the surgery for Fu Biao, he is a big shot on various aspects in the organ transplantation circle. He is awesome.

Investigator: It means that he is a top expert.

Ma Xiao: Yes, yes, top. That means, you can find nobody better than him. But the organ transplantation is our highlight, because our patients, patients...

Investigator: So you only have two wards for organ transplantation?

Ma Xiao: Yes, we are the transplant surgery department. Director Liu is managing these two floors, which are for organ transplantation.

Investigator: There are 100 beds on the two floors, aren't there?

Ma Xiao: No, we don't have so many beds. We don't have so many.

Investigator: That's why people have to wait, because you don't have so many beds. So as you said, there are also other kinds of patients?

Ma Xiao: Not like this. We have many patients, a lot of patients from all over the country. Many come to No. 302 Hospital, because of our reputation, in addition to [patients] from our own city.

Investigator: Yes, yes.

Ma Xiao: They all come here because of our reputation. This is the largest hospital specializing in liver diseases in the entire military. So there are lots of this kind of organ recipients.

Investigator: So generally speaking, you go to different hospitals to look for this type of donor organs, right? Do you have an age limit? The donor organs can't be used if the donor is very old, too old?

Ma Xiao: Right, right. We do have an age limit. We have a range. We won't use that kind of organs. We are very strict with our donor organs, very strict.

Investigator: Yes, so for your [donor organs], in addition to the ones you find yourself, you can still get some from the Red Cross. The Red Cross can provide some, can't they?

Ma Xiao: Well, it's hard to say. Anyway, from the Red Cross or hospitals, we.... I would like to know how you got my telephone number.
